

NUTRITION RISK REVISION STATE PLAN CHECKLIST FOR FISCAL YEAR 2013

WIC State agencies will be expected to implement the Nutrition Risk Revision by October 1, 2012. Changes to policies and procedures must be submitted with your Fiscal Year 2013 State plan, due August 15, 2012. We ask WIC State agencies to complete and submit this checklist with your policy and procedure changes. If a State agency is unable to meet this implementation date, it must submit a request for an extension and a timeline for implementation to the Regional Office.

Risk Criterion Number	Description of the Changes to the Risk Criterion Or Required Information	If previously approved by the RO, indicate date of approval, page numbers, and attach two copies of the final policy. Yes/No, Date, Page #	If a new policy is being submitted for approval, indicate the page numbers and attach two copies of the proposed policy. Yes/No, Page #	If the provision is optional and will not be implemented, note "Not Implementing." If implementation will be delayed, note "Delay" and give time frames. Yes/No, Date, Page#
103 Underweight or At Risk of Underweight	<u>103 Underweight or At Risk of Underweight (revised criterion):</u> Previously titled <i>Underweight or At Risk of Becoming Underweight</i> . The word <i>becoming</i> is deleted to be consistent with CDC terminology. The cut-off for birth to 2 years is revised to incorporate the new CDC Birth to 24 months growth charts (based on the WHO growth standards). The <i>Justification</i> section is revised to explain the new cut-off and the <i>References</i> section is expanded to include the WHO and CDC references pertaining to the recommendation to adopt the WHO growth standards.		Yes, Revised WPM 210-10, A10 & A11 pg. 4	
113 Obese (Children 2-5 Years)	<u>113 Obese (Children 2-5 Years) (revised criterion):</u> Previously titled, <i>Overweight (Children 2-5 Years)</i> . The terminology is changed from <i>overweight</i> to <i>obese</i> , based on the recommendations from the American Medical Association (AMA) and CDC. The cut-off has <u>not</u> been revised. The <i>Justification</i> section is revised to explain the change in terminology and the <i>References</i> section is expanded to include the AMA and CDC references recommending the change.		Yes, Revised WPM 210-10, A24 Overweight pg. 6

<p>114 Overweight or At Risk of Overweight</p>	<p><u>114 Overweight or At Risk of Overweight (revised criterion):</u> Previously titled, <i>At Risk of Becoming Overweight</i>. The word <i>becoming</i> is deleted to be consistent with CDC terminology. The terminology is changed from <i>at risk of overweight to overweight</i>, based on the recommendations from AMA and CDC. The cut-offs have <u>not</u> been revised. This risk includes parental obesity as an indicator of <i>at risk of overweight</i>, thus, it is still included in the title. The <i>Justification</i> section is revised to explain the change and the <i>References</i> section is expanded to include the AMA and CDC references recommending the change in terminology.</p>		<p>Yes, Revised WPM 210-10, A26/A28 pg. 6-7</p>	
<p>115 High Weight- for Length (Infants and Children <24 Months of Age)</p>	<p><u>115 High Weight-for Length (Infants and Children <24 Months of Age) (new criterion):</u> This is added to the list of allowed criteria based on a recommendation from CDC. Previously there was no criterion for this age group to classify an infant or child with excessive weight-for-length. The cut-off for this criterion incorporates the new CDC Birth to 24 months growth charts (based on the WHO growth standards).</p>		<p>Yes, Revised WPM 210-10, A30 pg. 7</p>	
<p>121 Short Stature or At Risk of Short Stature</p>	<p><u>121 Short Stature or At Risk of Short Stature (revised criterion):</u> The cut-off for birth to 2 years is revised to incorporate the new CDC Birth to 24 months growth charts (based on the WHO growth standards). The <i>Justification</i> section is revised to explain the new cut-off and the <i>References</i> section is expanded to include the WHO and CDC references pertaining to the recommendation to adopt the WHO growth standards.</p>		<p>Yes, Revised WPM 210-10, pg. 7</p> <ul style="list-style-type: none"> • Short stature is now High Risk • Short and At Risk of Short Stature are now separate risk codes 	
<p>152 Low Head Circumference</p>	<p><u>152 Low Head Circumference (revised criterion):</u> The cut-off for birth to 2 years is revised to incorporate the new CDC Birth to 24 months growth charts (based on the WHO growth standards). The age range for this criterion has been expanded to birth to 2 years (previously it only applied to infants) based on the recommendation for head circumference monitoring in <i>Bright Futures: Guidelines for health supervision of infants, children and adolescents</i> (3rd edition, AAP, 2008). The <i>Justification</i> section is revised to explain the new cut-off and the <i>References</i> section is expanded to include the WHO and CDC references pertaining to the recommendation to adopt the WHO growth standards.</p>		<p>Yes, Revised WPM 210-10, A25 pg. 6</p>
